

Biovision contributes globally to the implementation of the UN Sustainable Development Goals (SDGs) around the core theme of "food security and organic agriculture". In order to promote the implementation of the 2030 Agenda in Switzerland, Biovision runs the office of SDSN Switzerland together with the Center for Development and Environment (CDE) of the University of Bern. **SDSN Switzerland is part of the global UN Sustainable Development Solution Network (UNSDSN)** and strives together with its members and partners to implement the SDGs in Switzerland and beyond.

For our SDSN Switzerland team we are looking for a dynamic and ambitious, team-oriented personality **for 10 months as of 1 May 2021** (or by appointment) as:

TRAINEE UN SDGS AND FOOD SYSTEMS 80-100%

In this role you will contribute significantly to the expansion and measurable success of SDSN Switzerland. Your tasks include:

- Contributing to the conception, development, implementation and coordination of innovative sustainability projects in Switzerland / Assisting in the provision of proposals to foundations and institutional donors.
- Editing scientific documents and publications on topics related to the 2030 Agenda and food systems / Writing and editing texts / Reporting and writing of minutes
- Collaboration in the implementation of communication measures and support in content creation: e-newsletter, social media and website
- Participation in all events (online, hybrid & physical) of SDSN Switzerland in Switzerland / Support in planning, organisation and implementation
- Support with network / community management
- Further administrative and organisational support of the SDSN Switzerland team.

For this versatile position, you will bring the following skills and experience:

- Completed studies at ETH, university or university of applied sciences in a relevant field; for example environmental sciences, agricultural sciences, political sciences, or social sciences.
- Clear experience in a Swiss context and very good knowledge of the Swiss political landscape, sustainability and environmental protection in Switzerland
- Knowledge in the field of food systems, agroecology and policy dialogue
- Excellent knowledge of English (C2/C1), very good knowledge of French (C1) and German (C1)
- Ability to work independently, pragmatically and solution-oriented with a scientific attitude and outstanding interpersonal and intercultural skills
- Swiss passport or residence permit C (or B)

We offer access to our national network of over 50 members and partners. A versatile, exciting and varied job in a committed team with insight into all areas and tasks of an international UN network working towards achieving the 2030 Agenda in Switzerland and beyond. Furthermore, we offer you the opportunity to take on a responsible and varied role in a young, dynamic team and an innovative NGO. You can expect good social benefits, an appropriate salary and a centrally located workplace in Zurich as well as a motivating working environment.

Please send your entire electronic application documents with a picture until **29 March 2021** to: zukunft@biovision.ch. For further information, please contact Jorge Tamayo, Co-Direktor SDSN Switzerland (044 512 58 61, Mo-Do).
