

FORLIANCE initiates, finances, creates and manages robust nature-based climate projects. Together with our global partners, and our 30+ team members in ten countries, we strive to create intact forests and ecosystems that positively impact our climate, biodiversity and human well-being. Our Asset Management Services Division develops agroforestry projects converting abandoned land into modern large-scale cocoa plantations. With a sustainable business model and improved crop protocol management, we create innovative aromatic cocoa production systems, valuing the environment.

Within the frame of our activities' development, we are seeking a
