

## **Intern Product Development (f/m/d)**

**We are Planted.** After years of research, founded in July 2019 as a spin-off from ETH Zurich, it is our very aim to make the world better. With a revolutionary plan: Meat from plants.

Planted is more than a delicious product – it's also an attitude. We want to radically change the way people consume and perceive meat. And to trigger a switch from eating animal- to plant-based proteins.

We are making a change. Not only because we can. But because we have to. Do you want to be a part of it? In the internship in product development you will join our team for at least 6 months.

### **Your mission:**

- Drive and support product development projects from ideation to market launch in close collaboration with brand/marketing, sales, quality management and production
- Design and prototype clean-label plant-based products in line with our brand pillars and high culinary standards
- Support consumer research and involve customer and consumer feedback into the product development process to iteratively improve our products
- Support and drive upscaling, process optimization and production transfer of new products
- Report to our Product Developer and support our Product Development team in various tasks

### **You:**

- hold a Bachelor's or Master's degree (applied university/university) in Food Science, Product Design, Material Science
- ideally have a track record in the plant-based food space
- are a hands-on self-starter who is naturally curious and enjoys working in a fast-paced environment
- are able to take responsibility and work independently
- are creative, and love food, plant-based, technology and science
- are able to continuously challenge assumptions to seek innovative solutions and highest quality products
- show excellent communication skills
- are willing to revolutionize the food system by developing the best possible products
- are fluent in English, German is a plus
