

Student Assistants (HiWi)

May 2022 to end of September 2022, extension of contract possible

The Grassland Sciences group is looking for reliable and motivated student helpers to support our current research projects.

Job description

Your tasks will include some of the following:

- Field work at the Lägeren field site (mixed deciduous forest): support with soil respiration measurements (respiration, physiological variables, biomass, etc.)
- Field work at the Chamau field site (grassland): support with field measurements (biomass, LAI, flux station maintenance)
- Field work in Eschikon: setting up of experiment for outreach
- Lab work at LFW: biomass sample processing and analysis
- Data analyses: assistance of current data analyses and paper writing

Your profile

You are a student in Agricultural or Environmental Sciences or a related discipline and have an interest in getting hands-on experience in research on ecosystem-climate interactions. You are flexible to join our doctoral students in the field or lab on a regular basis. Please note that field work is weather dependent. You enjoy a reliable and accurate style of work.

Curious? So are we.

If you are interested, please send an email with a short statement of motivation and availability of working hours to Anna K. Gilgen (akgilgen@ethz.ch).

The starting date is preferentially **mid-May 2022**. Applications will be accepted until the positions are filled.
