

GENILLARD & CO

—INSURANCE FACTORY—

Genillard & Co. GmbH was founded in 2003 in Munich. We act as an independent consultant and broker for risk management and specialty insurance in both primary and reinsurance sectors and count large corporations and insurance companies among our customers. The focus here is on the topics of emerging risks, the consequences of climate change for agriculture and natural hazards.

You can find out more about our company on our website www.genillard-co.com

Our friendly, innovative and dedicated team is now looking for support for our:

Analytics, risk management & consulting in the field of agriculture/ natural hazards/ climate change (m/f)

(from October 2022 – 40 hours/5-day week)

Your tasks:

- Research and collaboration in projects with a focus on agricultural insurance and natural hazards
- Carrying out analytical activities primarily for our insurance customers
- Support in the initiation work for projects
- Through geospatial and remote sensing, analyzing the data & generating insights that contribute to the objectives of the projects
- Maintaining relationships, collaboration and communication with G&Co business partners, reinsurers and clients from desk (virtual) or through visits as allocated in the business plan for the financial year
- If required, comprehensive project management including project planning
- Appointment organization, implementation, reporting and billing
- Creation of agenda and presentations for customer meetings
- Follow-up work in relation to results or implementation from customer appointments
- Resubmission management (internal/external), e.g. for initiations and ongoing projects
- Desk and field survey as needed using third party service providers
- Research on selected factual and specialist topics as well as completion of market research tasks, particularly targeted at our most important customers and insurance markets
- Independent creation of information supplements for agricultural reinsurance contracts, including research into the necessary data
- Participation in the organization of workshops and support in the preparation of conferences, publications and lectures

Your profile:

- Master's degree in Agricultural Sciences, Earth Sciences and Climate Change or related studies with experience in the field of Agricultural Economics
- Knowledge of the (re)insurance industry would be an advantage
- Analytical competence and experience in data management
- Interest and experience in selling consulting concepts is an advantage
- Reliability and structured way of working
- High level of self-motivation and creative problem-solving skills
- Excellent written and spoken English and German skills
- Experience abroad is an advantage
- Safe handling of the MS Office programs Word, Excel and Power Point, digital media and internet affinity
- Active interest in climate change and natural hazards issues
- Ability to work in a team and work independently, proactively and responsibly
- High level of self-motivation and creative problem-solving skills
- Commercial as well as analytical and numerical skills

We offer:

- A good working atmosphere in an international and open-minded team with committed and cosmopolitan people in the heart of Munich and, if necessary, in the home office
- Team-oriented environment with personal creative freedom and personal responsibility
- Careful, structured induction and support from the well-established team of colleagues
- Opportunities for further education and training and excellent professional and personal development opportunities
- Participation in joint team events
- Employer-funded pension
- Meal vouchers for nearby restaurants
- Capital accumulation benefits
